

Cisco Meeting Server Intermediate (COLLAB250)

Duration: 3 days

Course Overview

The Cisco Meeting Server Intermediate (COLLAB250) v3.0 course shows you how to install, troubleshoot, and maintain Cisco® Meeting Servers. Through hands-on learning, you will learn how to install and configure Cisco Meeting Server in single combined and single split deployments, use troubleshooting tools, and integrate Cisco Meeting Server with popular communications applications.

Cisco Meeting Server brings premises-based video, audio, and web communication together to meet the collaboration needs of the modern workplace.

This course will help you:

1. Gain hands-on expertise installing Cisco Meeting Server in single combined and single split deployments
2. Troubleshoot Cisco Meeting Server installations with troubleshooting tools
3. Integrate Cisco Meeting Server with Cisco TelePresence® Video Communication Server (VCS), Cisco Unified Communications Manager, and Microsoft Skype for Business

Who should attend?

This course is for IT professionals who implement and maintain Cisco Meeting Server single server and single server split deployments including:

1. System engineers
2. Technical support personnel
3. Cisco integrators and partners

Prerequisites

To fully benefit from this course, you should first complete the following course or obtain the equivalent knowledge and skills:

[COLLAB150](#), or Acano Certified Operator, or equivalent knowledge

Course Objectives

After taking this course, you should be able to:

1. Install and configure a Cisco Meeting Server single combined server deployment inside the enterprise

2. Use the tools provided for troubleshooting
3. Install and configure a Cisco Meeting Server single split deployment that extends access to outside the firewall and that links to other internal Unified Communications applications
