## Introduction:

Security professionals armed with the necessary skills and knowledge are the only way to create value added departments. As quickly as the world and its continents develop, so do the risks and threats. Companies can no longer view their security departments and employees as lower level functions. In order to ensure departments function effectively within the realm of the larger corporate objectives, it is essential that security professionals and executives can manage and lead their teams to achieve effective industrial security and courses that can be implemented successfully. In order to achieve a consistent level of best practice the security professionals needs to understand the needs of his industry, his team and his security projects. The course is structured to equip delegates with the specialist knowledge to perform their management and supervisory duties to international standards in industrial security.
