## Course Contents:

The IEMA Certificate in Environmental Management is made up of three Modules:

### **Module 1: Fundamentals of sustainability, business and governance**

- Implications of global trends for the environment, society, the economy and for organizations and the role of an environment/sustainability professional in overcoming these challenges.
- Sustainable business/governance models and principles.

### **Module 2: Environmental principles, policy and legislation**

- Environmental principles.
- Major policy and legislation.

### **Module 3: Environmental management/assessment tools and skills**

- Major tools, techniques, systems and practices to develop sustainable products and services and improve sustainability performance.
- The role of innovation in developing sustainable products, services and solutions.
- Data collection, critical analysis and information reporting to inform decision making.
- Problem identification and opportunity assessment for delivery of innovative and sustainable products and services.
- Effective communications.
- Stakeholder identification and engagement.
- Tools, techniques, systems and practices to identify opportunities and risks.
- Project and program delivery to achieve performance improvements
- Implementing change and transformation.

### **Assessment:**

#### **The IEMA Certificate in Environmental Management is assessed by:**

- Assignments for each module - these are set by IEMA but marked by BTS.
- An assessment of competence - this is a practical application (this forms Module 4 of the program) and is submitted to IEMA for marking. It can only be submitted after all the other modules have been successfully completed.

## Entry Requirements:

Some prior knowledge of environmental issues is recommended such as those gained by undertaking the **IEMA Foundation Certificate in Environmental Management** or gained through work experience.
