Introduction:

Emergency response situations in the Oil & Gas industry are fast moving, often dangerous and can be chaotic. The range of potential incidents and emergencies which could affect, disrupt, or stress production are increasing. If managed correctly then not all these incidents will be critical or could be classed as a crisis, but those which result in significant losses, or put increased demand on the organization will have serious consequences for the company, the company's stakeholders, the country and the reputation of all those involved in the response. This course will teach you that meeting the commitment involves more than just being fully prepared. This intensive course will cover the best practices and the proven way of successfully dealing with a crisis. This course will constructively help delegates to develop those essential crisis management skills and reveal how to effectively use advanced techniques that will improve leadership performance at that critical time.

This course will help you to develop your leadership skills to lead others in times of crisis. You will become more aware of your strengths and limitations. In this course you will obtain the latest insights into what make a leader able to manage themselves and others during times of pressure and stress. By applying these leadership skills to the tasks and challenges you face in your work, you will begin to experience breakthroughs you never thought possible.

This course will highlight

- Evaluation of the latest listing of potential perilous risks to the Oil and Gas Industry
- Design of effective Crisis Management & Emergency Response strategies
