

Training Program:

Energy Management

www.btsconsultant.com

Introduction:

Energy costs are still rising and the threat of global warming means the spotlight is on energy use in buildings. Implementing energy policies and providing sustainable solutions to workplace management is a crucial part of managing energy consumption in buildings. Running costs can be reduced and environmental targets met through good management in buildings. This course examines how good practice in energy management results in positive recognition through innovative cost savings and support of key social issues for those operating buildings.

Who Should Attend?

The course is suitable for anyone who is looking to reduce energy costs in their buildings or estates. Amongst many others, it will benefit, facilities managers, office managers, directors, CSR managers, engineers and staff in charge of environmental issues at companies who need to reduce their energy use.

Objective:

- The course will cover the key aspects of developing an energy policy, and an effective awareness campaign. It will look at energy performance, metering, monitoring and targeting, and the important role it plays in energy management.
- The course aims to provide building designers and operators with the knowledge they need to develop a suitable energy policy. The course looks at both high and low cost measures to saving energy so it will equip building professionals with the ability to reduce energy costs whatever their budget.

Course Outline

- Why save energy?
- Developing an energy policy
- Introducing an energy efficiency campaign
- No-cost and low-cost measures for buildings
- Low and zero carbon technologies for buildings
- Integrating measures into the building design
- Implementing energy saving measures
- Raising staff awareness
- Using building log books and sub-metering
- Measuring energy performance through monitoring & targeting
- Part L, EPBD, asset ratings and operational ratings

Accreditation:

BTS attendance certificate will be issued to all attendees completing a minimum of 80% of the total course duration.
