Introduction:

The ever-increasing threat and uncertainty, impose a high demand on highly trained industrial security professionals to ensure the security and safety of persons and property, as well as sensitive corporate information. Industrial security professionals are directly and indirectly responsible for protecting many of the country's institutions and critical infrastructure systems, including industry and manufacturing, utilities, transportation, and health and educational facilities. Companies are also heavily invested in professional security to perform functions such as store security, private investigations, pre-employment screening, and information technology (IT) security. This program is designed to meet the needs of the security supervisor or manager to become efficient, technology oriented certified security managers who can manage the entire security in complex environments.

Who Should Attend?

Security Directors and Managers, Security Supervisors, Security Officers, Facility Supervisors, Facility Officers, Facilities Directors and Managers, Health and Safety, Fire personnel, Fire Managers, HSE Officers, Security Personnel and CCTV Operators, Loss Prevention Engineers, Control Center Operators and Supervisors, Emergency Personnel, Emergency Dispatchers, Security Personnel and CCTV Operators, HSE Officers, HSE Engineers & Personnel, HSE Professionals, Emergency Response Team Members, HSE Managers and Auditors, HSE Professionals, Inspectors, Advisors, Auditors, Laboratory Personnel, Process Control Engineers and Technicians, Process Control Designers and Systems Engineers, Instrumentation and Control System Engineers, Plant Engineers, Maintenance Personnel, Maintenance Engineers and Supervisors, Electrical and Instrumentation Supervisors and Technicians, Procurement and Supply Chain Managers, Engineers and Maintenance Personnel, HR and Administrative Supervisors responsible for security
