

RED HAT IDENTITY MANAGEMENT AND ACTIVE DIRECTORY INTEGRATION WITH EXAM (EX362)

DURATION: 4 DAYS

COURSE OVERVIEW

This course teaches you skills on the most requested Red Hat Identity Management (IdM) capabilities, including Active Directory trusts, multi-product federation, configuration management with Ansible, integrated certificate management, single sign-on, one-time passwords, and cybersecurity policy conformance.

TARGET AUDIENCE

- ☐ Red Hat Certified System Administrator (RHCSA) who wants to learn how to provision and configure IdM technologies across both Linux and Windows applications
- ☐ Identity management specialist or engineer
- ☐ Access management specialist or engineer
- ☐ Web application developer
- ☐ Dev Ops specialist

COURSE OBJECTIVES

- ☐ Install Red Hat Identity Management servers, replicas, and clients.
- ☐ Configure and manage Kerberos authentication and secure services.
- ☐ Create and manage a trust relationship with Microsoft Active Directory.
- ☐ Configure highly secure user authentication—local and remote—including two-factor authentication.
- ☐ Manage secrets, vaults, certificates, and keys.
- ☐ Troubleshoot identity management processes.
- ☐ Integrate Satellite 6 with IdM.
- ☐ Integrate Tower with IdM.
- ☐ Configure IdM backup and recovery.

COURSE CONTENT

Install Red Hat Identity Management

Describe and install Red Hat Identity Management (IdM).

Centralize Identity Management

Explain the IdM server services, explore IdM clients access methods, and install an IdM client.

Authenticate identities with Kerberos

Define the Kerberos protocol and configure services for Kerberos authentication.

Integrate IdM with Active Directory

Create a trust relationship with Active Directory.

Control user access

Configure users for authorized access to services and resources.

Manage a public key infrastructure

Manage certificate authorities, certificates, and storing secrets.

Maintain IdM operations

Troubleshoot and recover Identity Management.

Integrate Red Hat products with IdM

Configure major services to share the IdM authentication database.

Install scalable IdM

Construct a resilient and scalable Identity Management topology.

COURSE PREREQUISITES

- ☐ be certified as a [Red Hat Certified System Administrator \(RHCSA\)](#) (required)
- ☐ be certified as a [Red Hat Certified Engineer \(RHCE\)](#) (recommended, but not required)
- ☐ Attend [Red Hat Server Hardening \(RH413\)](#)
