Description:

This is a 5-day interactive workshop which will equip participants with principles for proper surveillance, leading to ability to make correct decision for optimum life cycle management of assets (well, reservoir and facility), production

Optimization and improved recovery. Tips for maximizing value from installed asset (well, reservoir and facility) and managing opportunities ensuing from technical reviews will also be taught during the course. The scope of the course will also cover the workflow of different reviews for identifying oil generating opportunities. The participants will also be introduced to other tools for enhancing well, reservoir and facility practices in their asset.

Objectives:

- Create understanding of WRFM
- Processes and tools.
- Equip participants with tools for
- Increasing efficiency of WRFM processes.
- Understand technique for maximizing
- value from installed assets (well, reservoir and facility)
- Acquire knowledge on management of
- opportunities ensuing from technical reviews
- Create understanding of workflows for
- WRFM technical reviews

Who should attend?

The course is intended for petroleum engineers, production engineers, Operations staff, business managers, technical support staff that are involved in well, facility and reservoir management and staff who have direct authority

over the WRFM process e.g. WRFM Team Leaders, Senior Discipline staff and staff in the Greenfield Community.

Course Outline:

- Introduction to WRFM
- WRFM Asset Health check
- Workflow of WRFM Structured Reviews
- WRFM Data acquisition and management
- WRFM process performance Management
- Management of WRFM opportunities
- Operating Envelopes
- Strategies for building WRFM and Data acquisition Plan.
