Safety & Protection of Assets & Facilities

Duration: 5 Days

Introduction:

The security of governmental buildings and facilities affects not only the daily operations of the government but also the health, well-being, and safety of employees and the public. This

also applies to important facilities operated by private companies or non-profit organizations. There is a need for building protection by investigating, detecting, deterring and disrupting security threats. In order to protect and safeguard effectively and efficiently, personnel need to be trained in communication skills, infrastructural know-how and methodologies for the coordination of relevant parties. This course is designed to provide necessary skills and instill participants with examples of best practices and the familiarity to implement them individually. This detailed and interactive course is designed to give a thorough understanding of how to manage security within an organization. It is designed for both experienced and non-experienced security managers. The course focuses on developments in security

management and addresses some of the more complex issues of corporate security management.

Who Should Attend?

Team Leaders, Managers, Line Managers, Supervisors, Team Leaders, Project Managers, Control Center Operators and Supervisors, Emergency Dispatchers, Security Personnel and CCTV Operators, HSE Officers, HSE Personnel, HSE Professionals, Emergency Response Team Members, HSE Managers and Auditors, Health & Safety and Environmental Professionals, Coordinators, Specialists and other full-time safety practitioners, Fire Officers, Loss Control Managers, Security Directors and Managers, Security Supervisors, Facilities Directors and Managers, HR and Administrative Managers with responsibility for security, Project Managers, Safety Inspectors, Plant Managers and Supervisors, Incident Control Point (Forward Control) Team Members, Supervisors, Advisors, Auditors, Laboratory Personnel, Emergency Personnel, Maintenance Personnel, Procurement and Supply Chain Managers, Engineers
