# Enterprise Supply Chain Management

## Introduction:

The challenges related to globalization, the environment and technology, among others, have a direct impact on how successfully enterprises can manage their supply chains. Enterprises around the world have reaped the benefits of better supply chain management through this course by reducing costs and lead times, improving productivity and quality, streamlining processes, and strengthening relationships and collaboration across supply chains. This course is suitable for any IT, finance, business, or sales executive working for an organization where supply chain is a strategic discipline. It clearly explains how implementing the correct supply chain processes can help you to achieve your cost-reduction goals; and if you are someone whose job depends on achieving these goals.

## Who Should Attend?

Logistics Consultants, Logistics and Financial Managers, Accounting and Operations Managers, Third-Party Logistics Providers, Supply Chain and Logistics Managers and Professionals, Operations Managers, Logistics Professionals, Logistic Providers, Logistic Administrators, Logistics Planning and Inventory Managers, Supply, Buying, Purchase, Logistics, Materials and Supply Chain Professionals, General Services Personnel, Purchasing and Procurement Managers, Retailers, Warehouse Personnel, Transportation and Distribution Managers/Personnel, Inventory and Warehouse Control Professionals, Freight Forwarders and Linear Specialists, Production Managers, Production Planners, Financial Managers, Project Managers, Distribution Center Supervisors, Line Managers, Fleet Managers, Fleet Supervisors, Fleet Operators, Fleet Inspectors

## Course Objectives:
