

Dear Sirs,

I am writing to express my strong interest in utilizing my extensive power engineering experience to deliver training programs and courses for your institute. With over two decades of expertise maintaining, installing, and commissioning thermal power plant equipment, I am confident I can provide impactful training that equips trainees with critical mechanical competencies.

My background includes hands-on work with static and rotating equipment like pipelines, steam and gas turbines, pumps, compressors, and more. I have developed deep technical knowledge as well as troubleshooting, problem-solving, and communication abilities from my roles. Whether conveying complex technical concepts or teaching practical maintenance skills, I am passionate about passing on learning in an engaging way.

In addition to my technical expertise, I bring strong capabilities in instructional design, course development, and adult learning principles tailored for trades and engineering programs. I stay on top of the latest advancements in equipment technologies and best practices that can be incorporated into training. My goal is to deliver training that truly builds capabilities and performance for real-world application.

With my rare blend of extensive field experience and passion for developing the next generation of plant maintenance professionals, I am confident I can contribute as an instructor for your programs. I would welcome the opportunity to discuss how I can help develop and deliver top-caliber training at your organization. Please feel free to contact me to further review my qualifications.

Thank you for your consideration.

Sincerely,

Eng. Mohammed Mowafi
Technical Consultant and Trainer
