Advanced Effective Fire Safety Management Program

Duration: 5 Days

Introduction:

Fire safety within a building or plant must be managed to be effective. Therefore; this course is concerned with the overall study of fire prevention, fire development, fire containment, fire dynamics, fire decay and suppression, and the means by which the management of fire safety measures mitigate the

consequences of fire in human, environmental and financial terms. Naturally, there cannot be an off the shelf solution. Every workplace is different. The purpose of this course is to improve fire safety not simply to collect and file risk assessments. So are you confident? Ask yourself that if a major fire occurred in your section, department or plant will people, including visitors and contractors, know exactly what to do and where to go? Will members of staff be able to instigate and implement the available emergency procedures? To help answer these questions this course will investigate the

principles and practices of warnings, evacuation, emergency procedures, training and exercises.

Who Should Attend?

Team Leaders, Managers, Superintendents, Line Managers, General Supervisors, Foremen, Supervisors, Project Managers, Fire Officers, Senior Fire Officer, Chief Fire Officers, Senior Fire & Equipment Personnel, Fire Coordinators, Fire Executives & Industry Personnel, Fire Responders, Fire Engineers Loss Prevention Engineers, Control Center Operators and Supervisors, Emergency Personnel, Emergency Dispatchers, Security Personnel and CCTV Operators, HSE Officers, HSE Engineers & Personnel, HSE Professionals, Emergency Response Team Members, HSE Managers and Auditors, HSE Professionals, Incident Control Point (Forward Control) Team Members, Inspectors, Advisors, Auditors, Laboratory Personnel, Process Control Engineers and Technicians, Process Control Designers and Systems Engineers, Instrumentation and Control System Engineers, Plant Engineers,

- Learn means of escape and emergency lighting
- Understand that requirements of a comprehensive fire risk assessment and training needs analysis for key responders
- Achieve a safer office/industrial environment for you and your company
- Learn the techniques for implementing effective fire safety management systems and emergency plans

Understand the necessities for an efficient and timely response

Course Outline:

Advanced Fire Safety Management:

- Course introduction, aims and objectives of the event
- Definitions and scope of fire safety management
- Moral, legal and financial reasons for promoting high standards
- A look at the statistics and of those companies who got it wrong

Organizing for Safety:

- Fire safety management roles and responsibilities
- Consultation with all staff and contractors
- Work equipment
- Hazardous substances

Concept of Safety Culture and Its Various Components

- How to develop a positive safety culture
- Human behavior and human failure
- Effecting a cultural change

Fire Protection and Fire Prevention Measures:

- Checklists, escape routes; lighting; stairways; emergency exits; escape doors; alarms & hardware
- Maintenance, safeguards & operational features for exit routes

- Fire safety signage
- Fire detection systems
- Firefighting equipment

Fire Risk Assessments and the Methodology for Carrying One Out

- Competency to conduct risk assessments
- The risk assessment process
- Report back of assessment

Management and Control of the Identified Fire Risks: Effective Fire Safety Management

- Causes and prevention of fire
- Principles of fire and explosion
- Checklists, ignition sources and fuels
- Chemistry of fire
- Classifications of fire
- Principles of fire and smoke spread
- Portable Fire Extinguishers (PFE)

Safety of People, Fire Protection, Evacuation Drills, Alarms and Exercises

- Fire protection (preventive and protective measures)
- Who has the responsibility for assessing & planning in your organization?
- What do you have in place now? Can it be improved?
- Perception and behavior of people in the event of a fire
- Emergency evacuation procedures for fires and different assembly points for bomb warnings
- Learning from evacuation drills & fire-fighting exercises
- Alerting mechanisms, warn the people but will they do what you want?
- Guidance on developing fire training, drills and exercises
- How to design successful evacuation exercises

- Exercise reports and recommendations
- What to do if the incident/evacuation is a prolonged on?
