Financial Accounting: Planning, Analysis And Reporting

Description:

This course is designed to help users to analyze and report their finances by discussing many topics. Basic concepts of financial planning, goal setting, and maximizing assets as well as the types of personalities and their investment profiles along with the various stages in the life cycle of an investor are discussed. An in-depth discussion of investing strategies is provided, including various instruments suitable for both savers and investors. The course also provides strategies for reducing tax burden, and building a model portfolio that suits your risk and return profile.
